POL-04 On-call handbook

Response time

Acknowledge a page within 5 minutes and be at a laptop within 15. If you cannot, escalate to the secondary at once.

Handover

At the end of a shift, write a handover in #payments-oncall: open incidents, silenced alerts, and anything the next person must watch.

Escalation chain

Primary on-call, then secondary on-call, then the engineering manager for payments, then the head of engineering.

Swapping shifts

Swap a shift with anyone on the rota, then change it in PagerDuty yourself. A swap that is only agreed in Slack does not move the pages.

Weekend pay

Each weekend day on call is paid at a flat rate, plus time off in lieu for any night you were paged after 23:00.
