POL-02 Incident severity

Severity levels

SEV1: money movement has stopped, or a customer sees a wrong balance. SEV2: payments are slow or one region is degraded. SEV3: an internal tool is broken.

Paging

For a SEV1 or SEV2, page the payments incident commander with /page ic-payments in Slack. Do not wait to be sure; a downgraded page costs less than a late one.

Status page

For a SEV1, post the first status page update within 15 minutes of declaring it, and every 30 minutes after.

Postmortem

Every SEV1 and SEV2 gets a written postmortem within 5 business days, reviewed at the Thursday reliability meeting.
